## Tips and Best Practices to Help Close This Care Opportunity

- **Standing orders** can help your office staff be part of the vaccination process
  - Offer vaccine information sheets (VIS) to read while patients wait
  - Medical assistants can verify interest and obtain the vaccine to be administered
  - Train staff to answer questions, administer and document in the patient’s chart
  - Consider having front office staff offer VISs in the patient’s preferred language
  - Immunize.org offers numerous translations that can be selected and printed, as needed
- Have **office staff wear pins** that show they’ve been vaccinated to help prompt patients to ask questions
  - Example: A ‘Got my flu shot’ button may prompt someone to ask if flu shots are available
- Provide patients **information about vaccines** based on timing and eligibility
  - As members are turning 50, share information about the shingles vaccin
  - Ask or check when patients received their last Tdap, has it been 10 years?
  - If they have a qualifying health condition or turning 65, share information about pneumonia vaccines
  - September through November provide information on influenza vaccines
- Stock vaccines in your office to make the visit a single stop for the patient and leverage trained staff to administer as part of their visit
- Consider which vaccines are most commonly needed based on your community
- Have a quick reference where patients can get vaccines not stocked at your office
- Place images and information about vaccinations throughout your office, including that they may be covered by the patient’s health plan or low cost, on:
  - Posters
  - Placards
  - Stickers on charts
